Current Position

New York University Abu Dhabi

Post-Doctoral Associate

Abu Dhabi

January 2022–Present

I am presently working with *Michail Maniatakos* in the Modern Microprocessor Architectures Lab – Center for Cyber Security. My primary research interests mainly lie in the confluence of Deep Learning and Security. I have recently been working with infamous Backdoor Attacks in collaborative Federated Learning environments. I have previously worked in employing state-of-the-art Deep Learning techniques in Hardware and System Security and designing robust countermeasures against different attacks on Deep Learning implementations. I am also interested in various security aspects of Deep Learning techniques like fault-resistance, privacy leakages, adversarial attacks, model-extraction, etc. My other research interests include analyzing physical side-channel leakages from secured cryptographic implementations through micro-architectures, power consumption, etc.

Education

Indian Institute of Technology, Kharagpur

Ph. D. in Computer Science and Engineering

Thesis: Design and Analysis of Robust Machine Learning in the context of Computer Security

Supervisor: Prof. Debdeep Mukhopadhyay

Kharagpur

July 2016–July 2022

Indian Institute of Technology (Indian School of Mines), Dhanbad

Master of Technology in Computer Science and Engineering, GPA - 9.7/10

Received M. Tech. with *Distinction* and secured 3rd place from the department

Dhanbad

July 2014–June 2016

Institute of Engineering and Management (under WBUT)

Bachelor of Technology in Computer Science and Engineering, GPA - 8.88/10

Kolkata

August 2009–May 2013

Internship Experience

Nanyang Technological University, Singapore

Title: *Lightweight Assessment of Malware for Embedded Architectures.*

Supervisor: Dr. Siew-Kei Lam.

Description: Worked in a team and developed a light-weight application to detect and prevent Malware for embedded platforms based on statistical t – *test*. The prototype of the application are implemented for both x86 and ARM processors.

Duration: August 2017 - January 2018.

Industrial Collaboration

IBM Research India

Title: *Security Analysis of Containerized Environment*

Description: Analyze the security vulnerabilities in a containerized environment through micro-architectural footprints. The objective is to investigate different possibilities and designing efficient countermeasures.

Duration: August 2019 - June 2021.

TCG Digital Solutions Private Limited

Title: *De-anonymization of Tor Communication*

Description: Design of an efficient and low-cost solution for building traffic correlation attacks on anonymized Tor network to de-anonymize Tor users and clients.

Duration: September 2018 - April 2019.

Achievements

- 3rd Best Poster Award at SPACE 2020.
- 2nd Best Presentation Award in Applied Research Competition at CSAW 2019.
- Best Student Paper Award at CARDIS 2019.

- **IBM PhD Fellowship Award** for the Academic Year 2019-2021.
- DSCI Excellence Award as a team - felicitated by Bharat Chamber of Commerce.
- **3rd Best Poster Award** in Young Researcher's Forum at SPACE 2018.
- Finalist of Qualcomm Innovation Fellowship India 2017 and 2019.
- **2nd Best Hardware Demo Award** in Embedded Security Challenge at CSAW 2016.
- **National Merit-cum-Means Scholarship** awarded by WBMDFC from 2009 to 2013.
- **National Merit Scholarship** awarded by Govt. of India for securing position among Top 20 in Higher Secondary (10+2) Board Examination in 2009.

Competitions

- Cyber Security Awareness Week - Applied Research Competition in India** **2019**
Indian Institute of Technology Kanpur *Kanpur*
 Presented a hardware activity based monitoring approach to evaluate privacy leakages in Deep Learning Algorithms. Secured 2nd place in the competition from all over India.
- HOST: Hardware Demo** **2018**
IEEE International Symposium on Hardware Oriented Security and Trust (HOST) *Washington DC*
 Designed a lightweight malware detection methodology for embedded platforms along with a fast ransomware detection techniques using Hardware Performance Counters. Reached Final round in the competition from all over the world.
- Cyber Security Awareness Week - Embedded Security Challenge in India** **2016**
Indian Institute of Technology Kanpur *Kanpur*
 Designed a novel hardware mitigation technique for memory corruption and control flow integrity attacks in embedded systems. Secured 2nd place in the competition from all over India.
- International Championship for Artificial Intelligence & Networking** **2015**
Indian Institute of Technology Bombay *Mumbai*
 Designed a cost effective prototype of a carom playing bot from scrap materials. Secured 2nd place in the competition from all over India. Demonstration can be found on the following link. (https://www.youtube.com/watch?v=18lkxVzs_Zk).
- National Round of Indo-US Robo League** **2015**
Indian Institute of Technology Bombay *Mumbai*
 Reached Pre-Final round for designing a cost effective Line Follower Robot.

Invited Talks and Tutorials

- **Artificial Intelligence in Security: Potential to Make and Break a Secure Connected World**
 - 35th International Conference on VLSI Design, Virtual, February 2022.
 - Co-Speaker: Debdeep Mukhopadhyay
- **In-situ Extraction of Randomness from Computer Architecture**
 - Workshop on Cyber Physical System Security, Indian Institute of Technology Kharagpur, India, December 2019.
- **Early Detection of Anomaly using Side-Channel: Statistics and Learning**
 - Workshop on Advanced Side Channel Evaluation of Hardware Security, Indian Institute of Technology Kharagpur, India, July 2018.

Professional/Academic Services

- **Reviewer of Journals:** *IEEE ESL, IEEE TIFS, IEEE TVLSI, IEEE CIM, ACM TECS, ACM JETC, IACR TCHES, IET TRIT, Springer Sādhanā*
- **Reviewer of Conferences:** *CARDIS, CCS, DAC, DATE, Indocrypt, NDSS, S&P, SPACE, TrustCom, Usenix Security, VLSI-SoC*
- **Reviewer of Workshops:** *COSADE, CPSS, TopinHES, WOOT*
- **Organization of National and International Events:**
 - Workshop on Cyber Physical System Security, Indian Institute of Technology Kharagpur, India, December 2019.
 - Workshop on Advanced Side Channel Evaluation of Hardware Security, Indian Institute of Technology Kharagpur, India, July 2018.

Technical Skills

- Relevant Software Skills:
 - **Programming Languages:** Python, C, C++, JAVA
 - **Deep Learning Libraries:** PyTorch, Tensorflow, Keras
 - **Micro-architectural Performance Analysis Tools:** perf, PAPI

- Relevant Instrumentation Skills:
 - **Deep Learning Edge Devices:** Google Coral Dev Board, Intel Movidius Neural Compute Stick
 - **High Resolution Imaging:** Carl Zeiss Crossbeam 340 High-resolution Scanning Electron Microscope

Teaching Assistance

Computer Programming Lab (UG Course): Autumn 2015 and Spring 2016	IIT(ISM) Dhanbad
Data Structures Lab (UG Course): Autumn 2015	IIT(ISM) Dhanbad
Algorithm Design & Analysis Lab (UG Course): Spring 2016	IIT(ISM) Dhanbad
Programming and Data Structures Lab (UG Course): Spring 2017	IIT Kharagpur
Foundation of Algorithm Design and Machine Learning (UG Course): Spring 2018	IIT Kharagpur
Cryptography and Network Security (PG Course): Autumn 2018 and Autumn 2019	IIT Kharagpur
High Performance Computer Architecture (PG Course): Spring 2019 and Spring 2020	IIT Kharagpur
Programming and Data Structures Theory (UG Course): Autumn 2020	IIT Kharagpur
